Texas State Operations Center

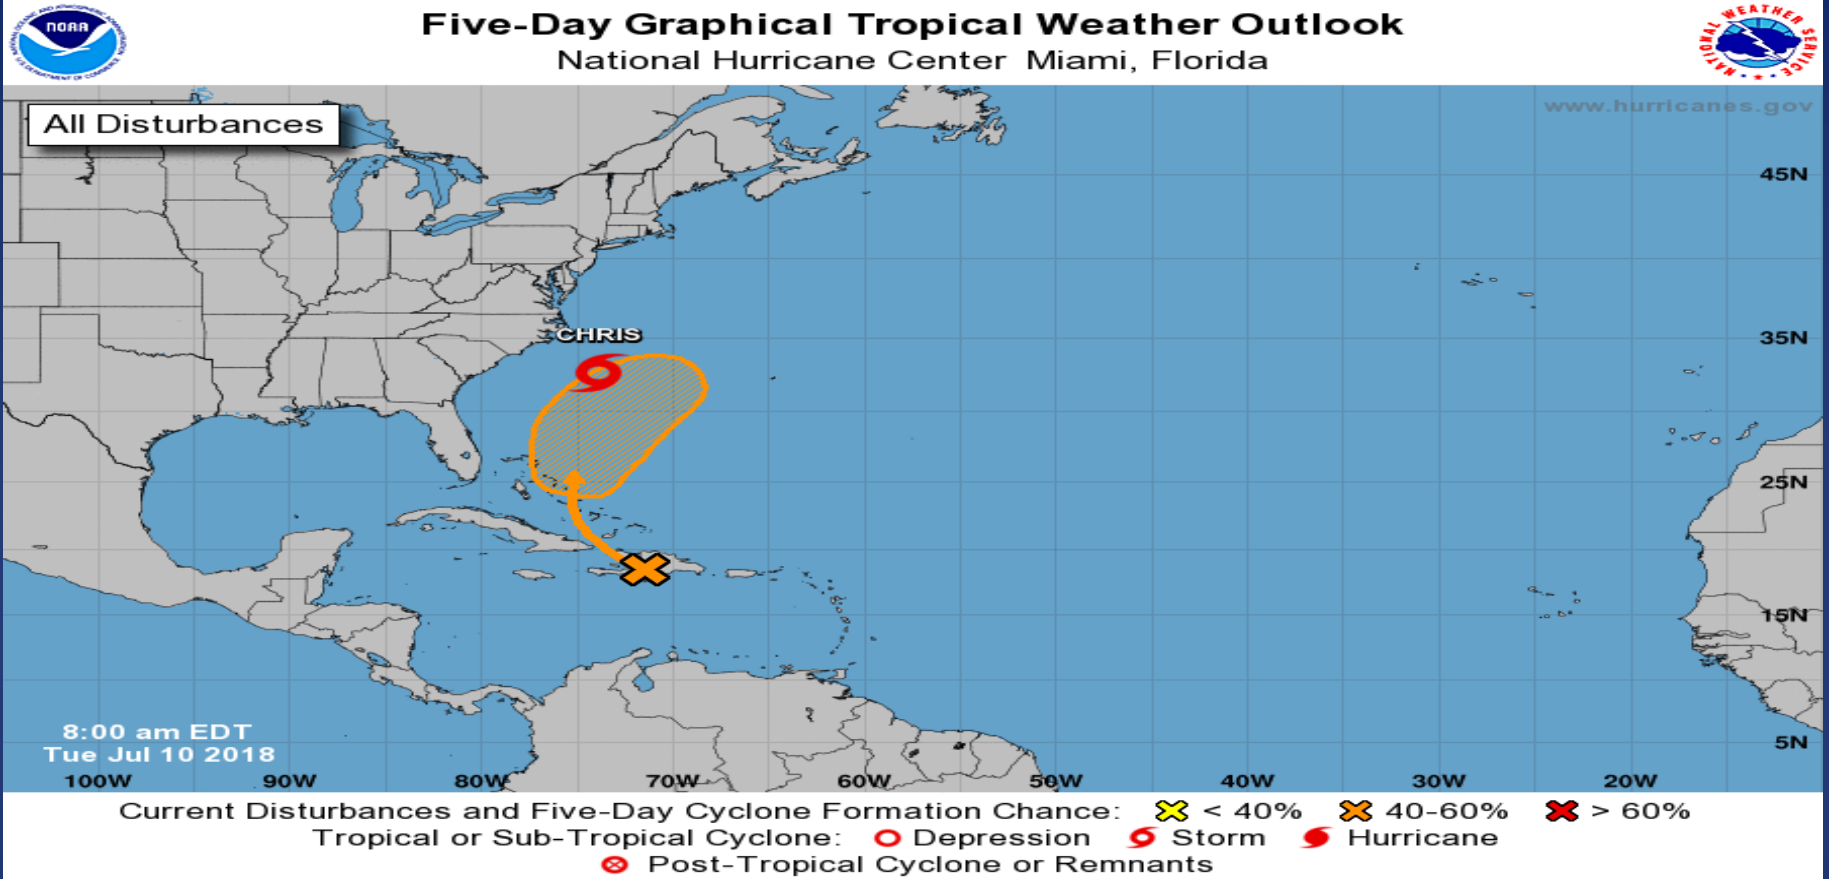

Situation Awareness Brief

Tuesday, July 10th 2018
As of 0900 CST

Tropical Weather Awareness

For the North Atlantic...Caribbean Sea and the Gulf of Mexico: The National Hurricane Center is issuing advisories on Tropical Storm Chris, located a couple of hundred miles south-southeast of the North Carolina Outer Banks. 1. The remnants of Beryl are producing gusty winds and areas of heavy rain over portions of central and eastern Hispaniola, and the adjacent Atlantic and Caribbean waters. This system is expected to move west-northwestward across the rest of Hispaniola today and over the southeastern Bahamas this evening. Little development is expected during the next day or so due to land interaction and unfavorable upper-level winds. The disturbance is forecast to turn northward over the western Atlantic on Wednesday where upper-level winds could become a little more conducive for the regeneration of a tropical cyclone later this week. Regardless of development, locally heavy rains and gusty winds are likely over portions of Hispaniola and the Bahamas as the remnants of Beryl move through those areas. Additional information on this system can be found in High Seas Forecasts issued by the National Weather Service. * Formation chance through 48 hours...low...20 percent. * Formation chance through 5 days...medium...50 percent

Incidents Reported to the State Operations Center (last 24 hours)

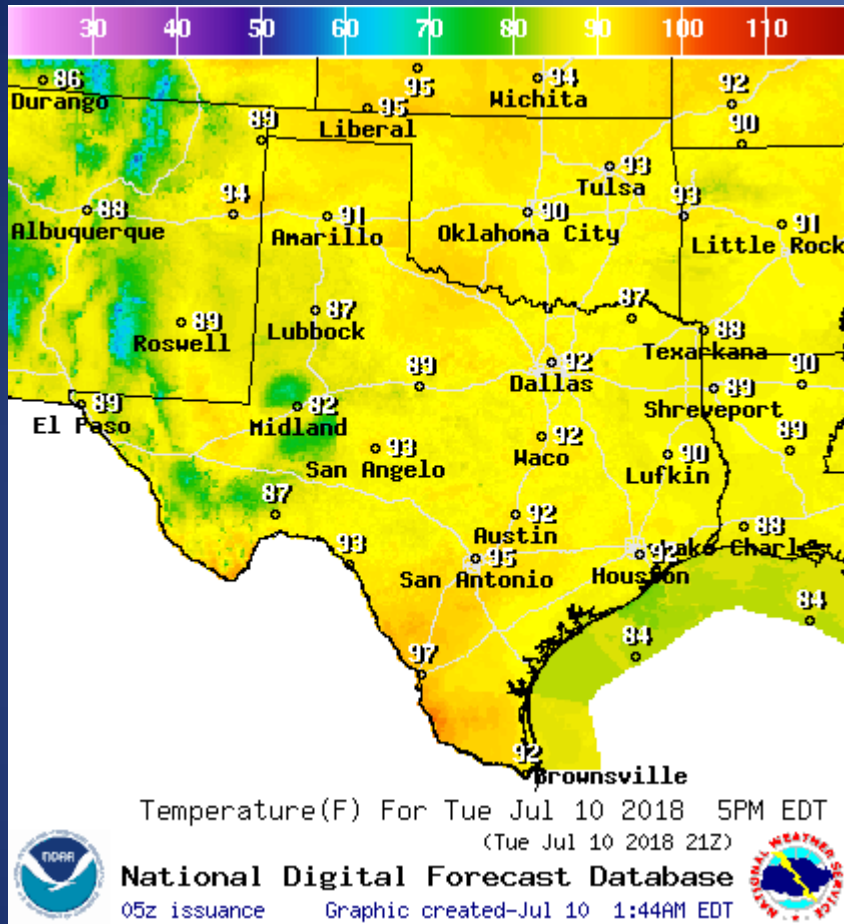

DATE	EVENT / INCIDENT	LOCATION (City/County)	Final Report: Y/N
07/09/18	Initial Report of a Road Closure (US59) due to a TTST Accident	Wharton County	N
07/09/18	Update Report #1 of a Road Closure (US59) due to a TTST Accident	Wharton County	N

72	74	73	73	75	74	73	74

High temperatures will range from the upper 80s to the lower 90s this afternoon with scattered showers and thunderstorms once again developing across the area. Some of the thunderstorms that develop could approach strong levels and produce gusty winds, locally heavy rainfall, and deadly lightning. Showers and thunderstorms will gradually decrease during the evening with overnight low temperatures ranging from the lower to middle 70s

Hazardous Weather

Today

Scattered afternoon T-storms with highs around 90.

Weather Forecast Office
Lake Charles, LA
Issued Jul 10, 2018 6:35 AM CDT

Drier mid level air will help suppress thunderstorm activity today. Highs will be around 90 with Southwest to Northwest winds less than 10 mph.

Isolated to Scattered Showers and Thunderstorms Today

Partly cloudy with very warm temperatures this afternoon

Weather Forecast Office
Brownsville/RGV, TX
Issued Jul 10, 2018 4:06 AM CDT

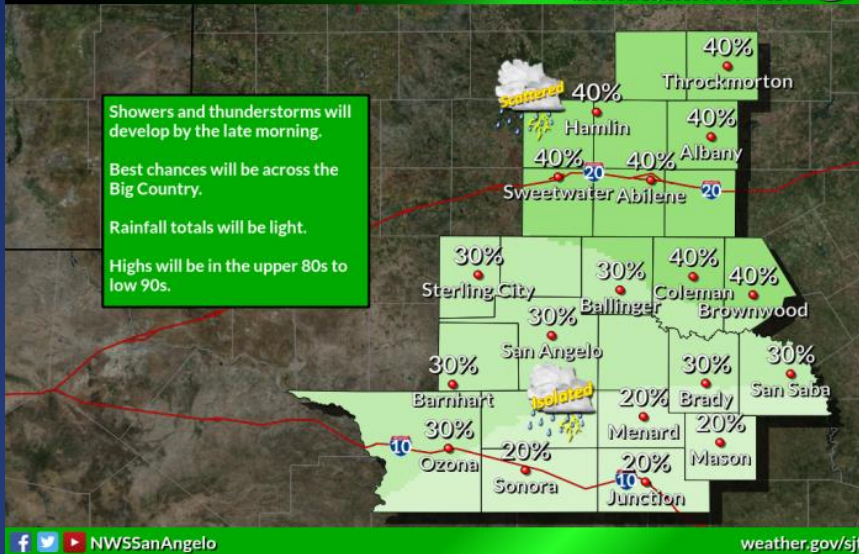

The seabreeze front will provide isolated to scattered showers and thunderstorms across portions of the Rio Grande valley and northern ranchlands this afternoon. Expect partly cloudy skies with southeast winds 10 to 15 mph across deep south Texas today. Highs will be in the lower to mid 90s across most of the area this afternoon with temperatures reaching the upper 90s to near 100 degrees across extreme western portions of deep south Texas.

Hazardous Weather

Continued Rain Chances

Weather Forecast Office
San Angelo, TX
Issued Jul 10, 2018 5:49 AM CDT

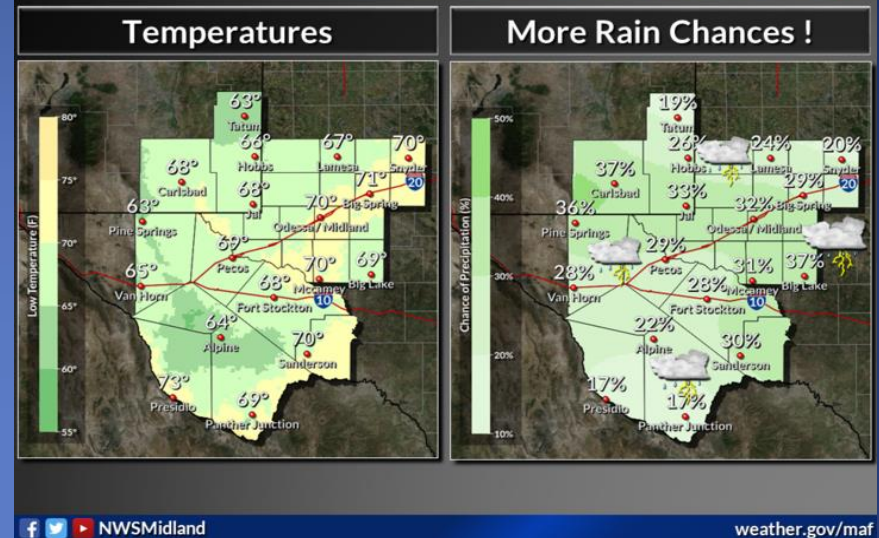

More showers and thunderstorms expected across the area today. Best chances will be across the Big Country. Rainfall totals will be light.

Tonight

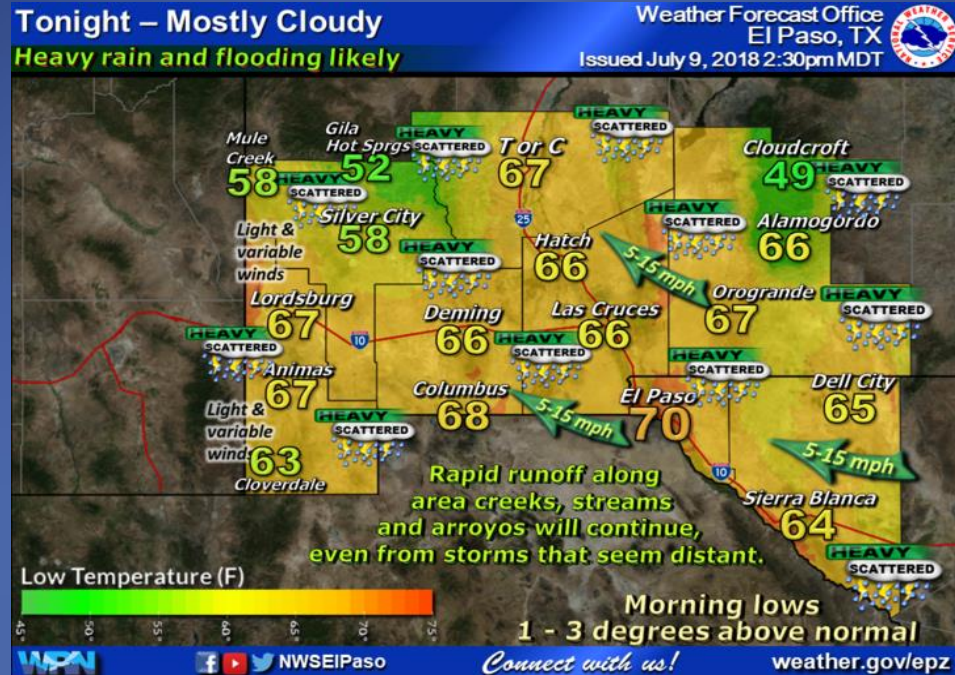

Near-normal temperatures.

Weather Forecast Office
Midland/Odessa, TX
Issued July 9, 2018 1:42 PM CT

Scattered showers and thunderstorms are expected to develop again today, some of which could produce heavy rainfall, if not localized flash flooding. High temperatures will be around 5 degrees below normal.

Hazardous Weather

Abundant Monsoon driven moisture will continue to flow over the area from the south and east this evening, in an already unstable atmosphere. This will favor the continuation of scattered thunderstorms overnight. Winds aloft which help steer the storms will remain light, so storm movement will be slow at best. The potential for flooding is high from any new activity that develops. Rapid runoff along area creeks, streams and arroyos is expected, even from storms that seem distant. Morning lows will end up near or a little above normal.
